15-30-15+TE

High Phosphorus Soluble Fertilizer

Introduction :-

A highly soluble fertilizer in the percentage of phosphorus, 30% from sources of urea phosphate and monoammonium phosphate, in addition to the elements nitrogen, potassium and micronutrients. It is produced from the purest types of raw materials. It is a fine and homogeneous crystalline powder that is completely soluble in water and fast absorption. It is used in various fertilization programs with irrigation water and with foliar spraying.

Symptoms of phosphorus deficiency in different crops

Onion

Wheat

Cucumber

Potato

Tomato

Citrus

Cauliflower

Lettuce

Composition:-

Nitrogen Total	Nitrogen Urea	Nitrogen Ammonium	Phosphor Total	Phosphor MAP (Mono Ammonium Phosphate)	Phosphor Urea Phosphate	Potassium Total	Potassium Potassium Sulphate	PH
N	NH ₂	NH ₄	P ₂ O ₅	(NH ₄) (H ₂ PO ₄)	CO(NH ₂) ₂ .H ₃ PO ₄	K ₂ O	K ₂ SO ₄	PH
15	9.5	5.5	30	27.8	2.2	15	15	3 - 4

How to use and Dosage :-

Crop	Dosage
Outdoor Cultivations	0.75 - 138 g / plant / day
Green Houses	1.5 - 3.2 Kg / 500 m ² / Treatment
Foliar Spraying	2.1 - 3 Kg / Hectare / 1000 L
Fruit Trees	100 g / Tree / Week (1 - 5 Kg / Season)
Pivot Irrigation	5.5 - 7.5 Kg / Hectare / Treatment
Lawn Foliar Fertilization	2 - 2.5 Kg / Hectare / Treatment
The dosage depending on the soil analysis and the soil nutrition	

Usage Recommendations:-

- Keep out of direct sunlight.
- Store in dry and cool conditions, and the storage does not exceed 5 compact bags.
- Avoid contact with hands and eyes.
- The bags must be tightly closed
- It is recommended to use masks and gloves when handling the product

Packing:-

Purti Gala 15-30-15+TE is available in 25 kg bags
